## **Realty ONE Group Receives Top Ranking on Inc. 500**

*Extraordinary growth in an uncertain real estate market.*

LAS VEGAS - Realty ONE Group's astronomic success and growth was recognized by Inc. magazine in their latest, widely followed rankings. The real estate brokerage, which began just four years ago in Las Vegas, grabbed the second spot for overall gross revenues with sales of over \$1.1 billion in 2008.

Realty ONE Group also captured the 192nd spot on Inc.'s coveted Inc.500 list for fastest growing companies in America. Beginning in 2005 with revenues of just over \$100 million, Realty ONE has since exploded with 1,024% growth, despite the difficult real estate market that has shuttered several of its competitors. Many of America's most recognized enterprises and brands began on this coveted list of exceptional business performers—companies such as Microsoft, GoDaddy, Under Armour, Oracle and Jamba Juice all began as notables in the Inc. 500 rankings.

"This recognition for our phenomenal growth for our young company is simply amazing," said Kuba Jewgieniew, CEO of Realty ONE Group. "Our success is directly linked to our focus on providing a supportive environment to our dedicated professionals and commitment to excellence within the organization. Our goal of becoming the top real estate company in the entire southwest region is fast becoming reality."

Inc. magazine is a popular monthly publication for America's growing companies. Its Top 500 issue, introduced in 1982, is the most-followed ranking for American private companies and is often an early indicator of tomorrow's leading U.S. corporations. Realty ONE Group is a real estate brokerage firm with over 2,500 associates, headquartered in Las Vegas, Nevada, which focuses on providing ethical, professional and results-oriented services to property owners and prospective real estate buyers. Since its inception in 2005, the company has grown to become the largest real estate brokerage in Nevada and the fastest growing real estate company in Arizona.
